

Mary Tallontire

creative technologist // 3D generalist

marytallontire.co.uk

Education

2024/25- MSc Digital Media and Design, University of Edinburgh (distinction)

2020/23- BSc Digital Arts Computing, Goldsmiths University (first)

2024- Beyond Brontes, Screen Yorkshire

Work experience

2025- Immersive commission The Garden for Prism Festival 2025

2024- Creative Technologist (various contracts), Reflex Arc

2023- Design Intern, Potion Pictures and freelance work for Potion Pictures

2023- Artist in Residence, Thin Air at The Beams

Other

2024 and 2025- Exhibitor at immersive arts festival Voidspace Live

2025- Honourable mention in Zero Day Productions: Solar Punk Jam as part of duo

Gertrude Bungalow

2025- Guest exhibitor at Playtopia, ECGX and MDes Game Design, Herriot-Watt showcase

2024- Digital game 'rarity' featured in alternative indie games magazine Indiepocalpyse

2022- Exhibited art piece at 'With Whom We Mutually Communicate?' Copeland Gallery

The Garden

Interactive immersive experience

Commissioned by Waterside Arts for Prism Festival 2025

Installation inspired by solar punk, science fiction and optimistic visions of a sustainable future. Using Unity and web sockets, the speculative world reacts to the collective decisions of audience members, who interact through a website on their phones

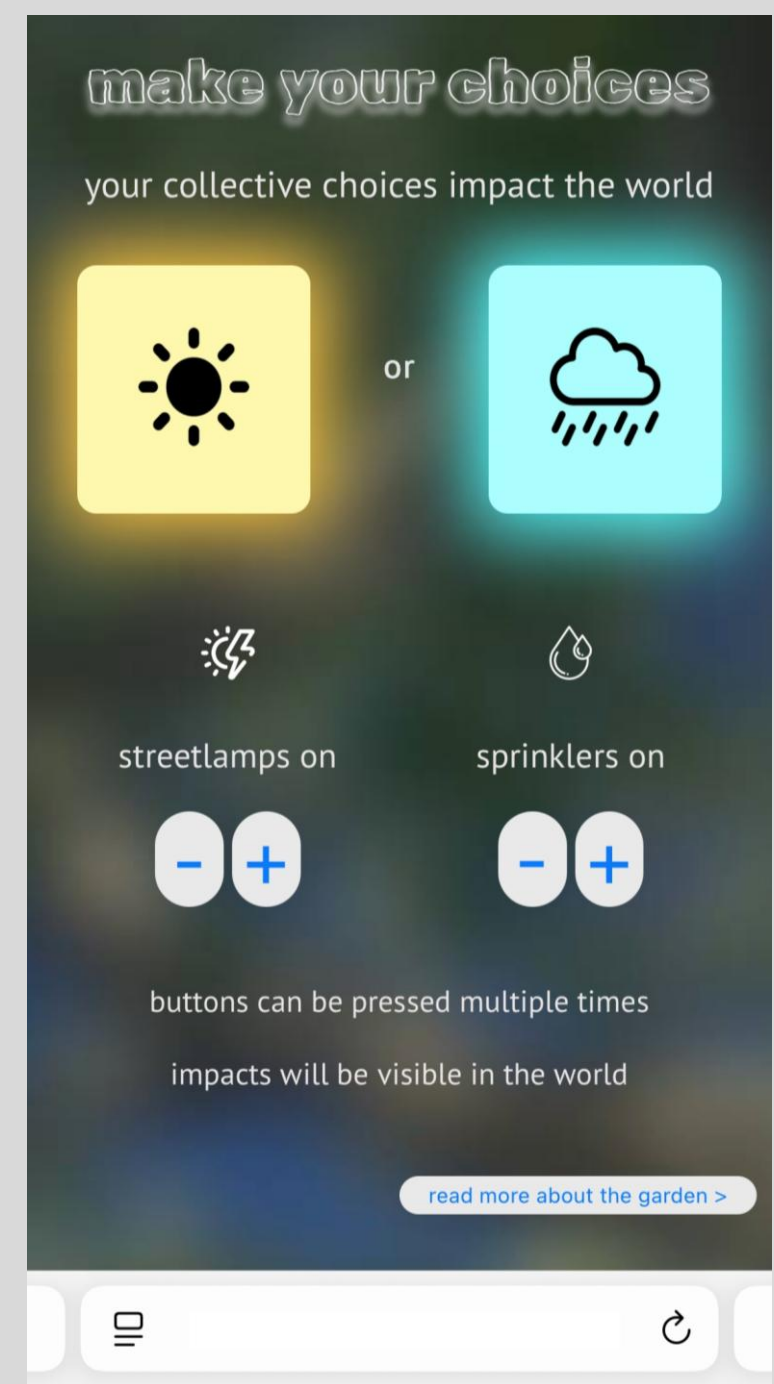

The audience scanned a QR code to connect to the world through their phones, allowing everyone to collectively influence the weather. This then caused either solar energy or rainwater to accumulate, which was used to power lights and sprinklers within the digital space, allowing continuous change within the environment.

It was great to watch all generations engage and interact with the world and with each other, inspiring social interactions between audience members. I'd love to develop this concept further and expand upon this gamified, interactive experience, whilst keeping the immersive, mediative core of this piece.

Hedgeborough

Digital game built in Unity and Blender

Solo project

An open world game about the city of Hedgeborough, where a newspaper about declining hedgehog numbers kickstarts community action to improve the biodiversity of the urban area, helping to bring the city together to improve public spaces and maybe bring back hedgehogs too....

Welcome to Riverside Park!

Managed by Hedgeborough Council

Open 9am - 6pm daily.
Gates locked outside of opening times.

Hand out the fliers

Ava has given us 5 fliers for the Hedgehog saving community group to hand out to people in town.

Help us save
hedgehogs

Released in September 2025

available from <https://matallon.itch.io/hedgeborough>
trailer can be found here <https://www.youtube.com/watch?v=UQsHTBRH3P8>
more at <https://marytallontire.co.uk/hedgeborough>

Revolves around re-thinking urban environments and using digital tools to engage young people with urban community, nature and wildlife conservation. Looked at digital natives' relationships with technology and how their reliance on digital networks can mean that they are less aware of local community and their own physical environment. To reach this generation in their own terms and using technology familiar to them, I created this game to encourage players to consider their own agency and the potential of their actions to rewild local space and positively impact their environment..

Breadleg

Digital game built in Unity and Blender

Solo project

Breadleg is an absurdist, comedy, open world game about running round a Scottish village as a piece of bread with legs. Encounter the people of the village and collect socks to help you escape without being eaten, whilst maybe getting involved in a bit of mischief along the way.

Inspired by Scottish fairy tale The Wee Bannock. Designed to appeal to children (and adults!) over 8 years old.

Breadleg

Nowhere Actually Existing

Digital worlding project built in Unity and Blender

Solo project

This is Nowhere Actually Existing, and at its core, it is exactly that. It is a digital worlding piece illustrating a place that doesn't exist, and won't ever exist. It is a world that solely comes from my head and my imagination, embodying ideas of simulation being a presentation of a person's perception of reality, originally coming from game designer Doris C. Rusch.

At Thin Air, The Beams (London) in June 2023

At Goldsmiths
University's SIML
space in May
2023

The world depicts an idyllic, sustainable community, with animals running around freely and wildly, depicting a Utopia, and particularly my utopia, as it is my perception of reality. The name comes from the book *The Village Against The World* which discusses the village and inhabitants of Marinaleda in Spain who created a 'Utopia' and a foundation for a cooperative way of life. However, this world is only a simulation, and however perfect it may present as, it has its flaws, and it calls on you to find them. This utopia isn't real and will assure you you're aware of it.

game version available from

Consumption Model

Digital worlding project built in Unity and Blender

Solo project

Released March 2025

Dystopian interactive worlding experience Consumption Model created to encourage players to think and assess the current technology landscape and digital oligarchy. Revolves around Feenburg's 2012 paper Re)Inventing The Internet: Critical Case Studies that discusses different models of the internet, in particular the consumption model, and themes of digital oligarchy, trans-humanism and cyborgs (Haraway, 1985). In Consumption Model, a future where these themes manifest is created. The digital world itself acts as a mechanism of the world's oligarchy, as an embodiment of the internet consumption model.

Designed to make players question their relationship with the internet and the interrelationship between digital technology and society, displaying the dangers of power embedded within tech whilst also highlighting the positives of the community model of the internet and collective organisation.

available from <https://matallon.itch.io/consumptionmodel>

Aunty Jam's Birthday Cake

Digital game project in Unity and Blender

Created with Audrey Lewis as duo Gertrude Bungalow

Play as Maude, a kid living in a solar punk future, as you help your neighbourhood prepare for your Aunty Jam's birthday party. Discover all the elements of a solarpunk world through the low-stakes and joyful practices of interacting with your neighbors, helping with tasks, and exploring your environment. Aunty Jam's Birthday Cake is a relaxed look at the importance of communities sharing workloads, centering ecological resilience, and celebrating together.

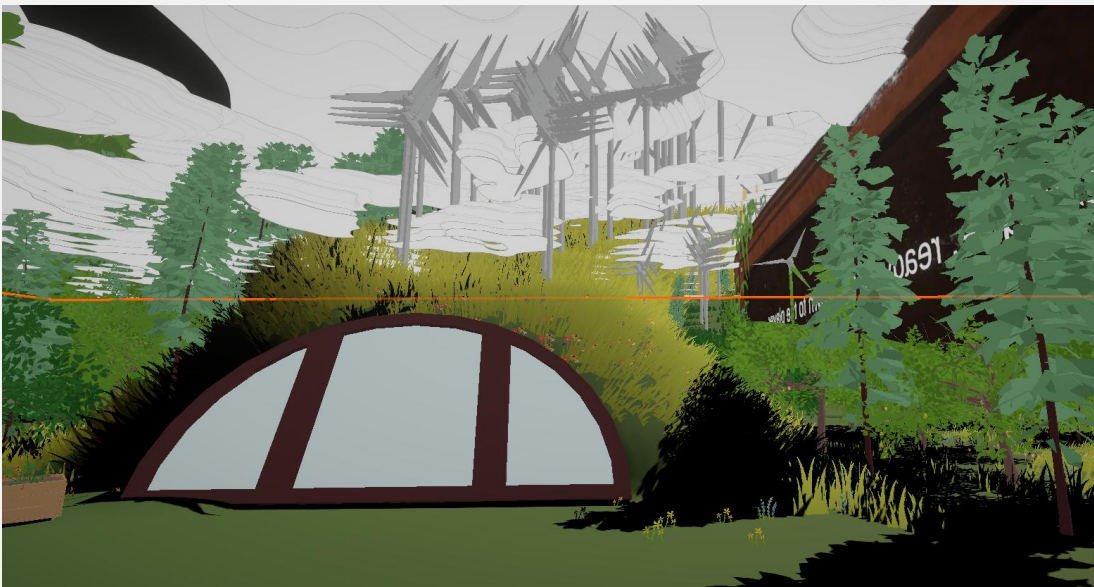

Mum

Are you brave enough to embark on the quest?

Rarity

Digital game project in Unity and Blender
Solo project

Slowly reassemble the new landscapes

Short little 3D, first person narrative game about life continuing after COVID and the weird time skip that occurred for people as their lives drastically changed in an ephemeral but 3-year time period.

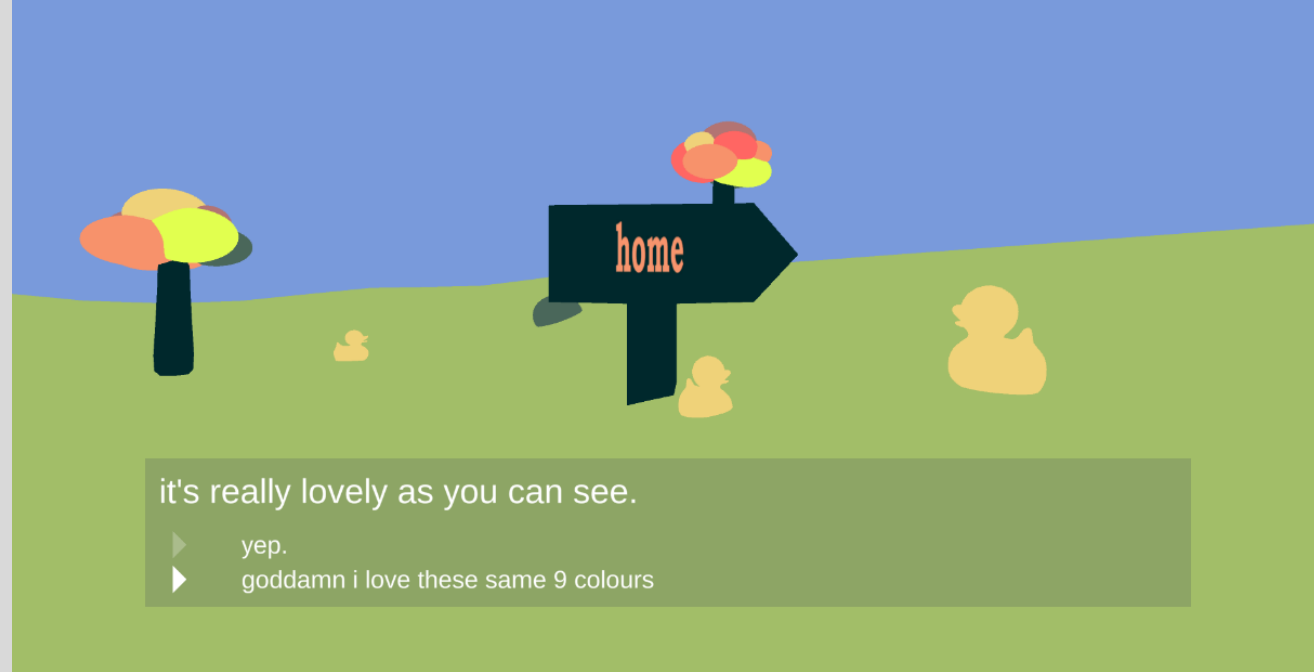

Explores themes surrounding University, friendships, the feeling of time passing and it being over before it's begun.

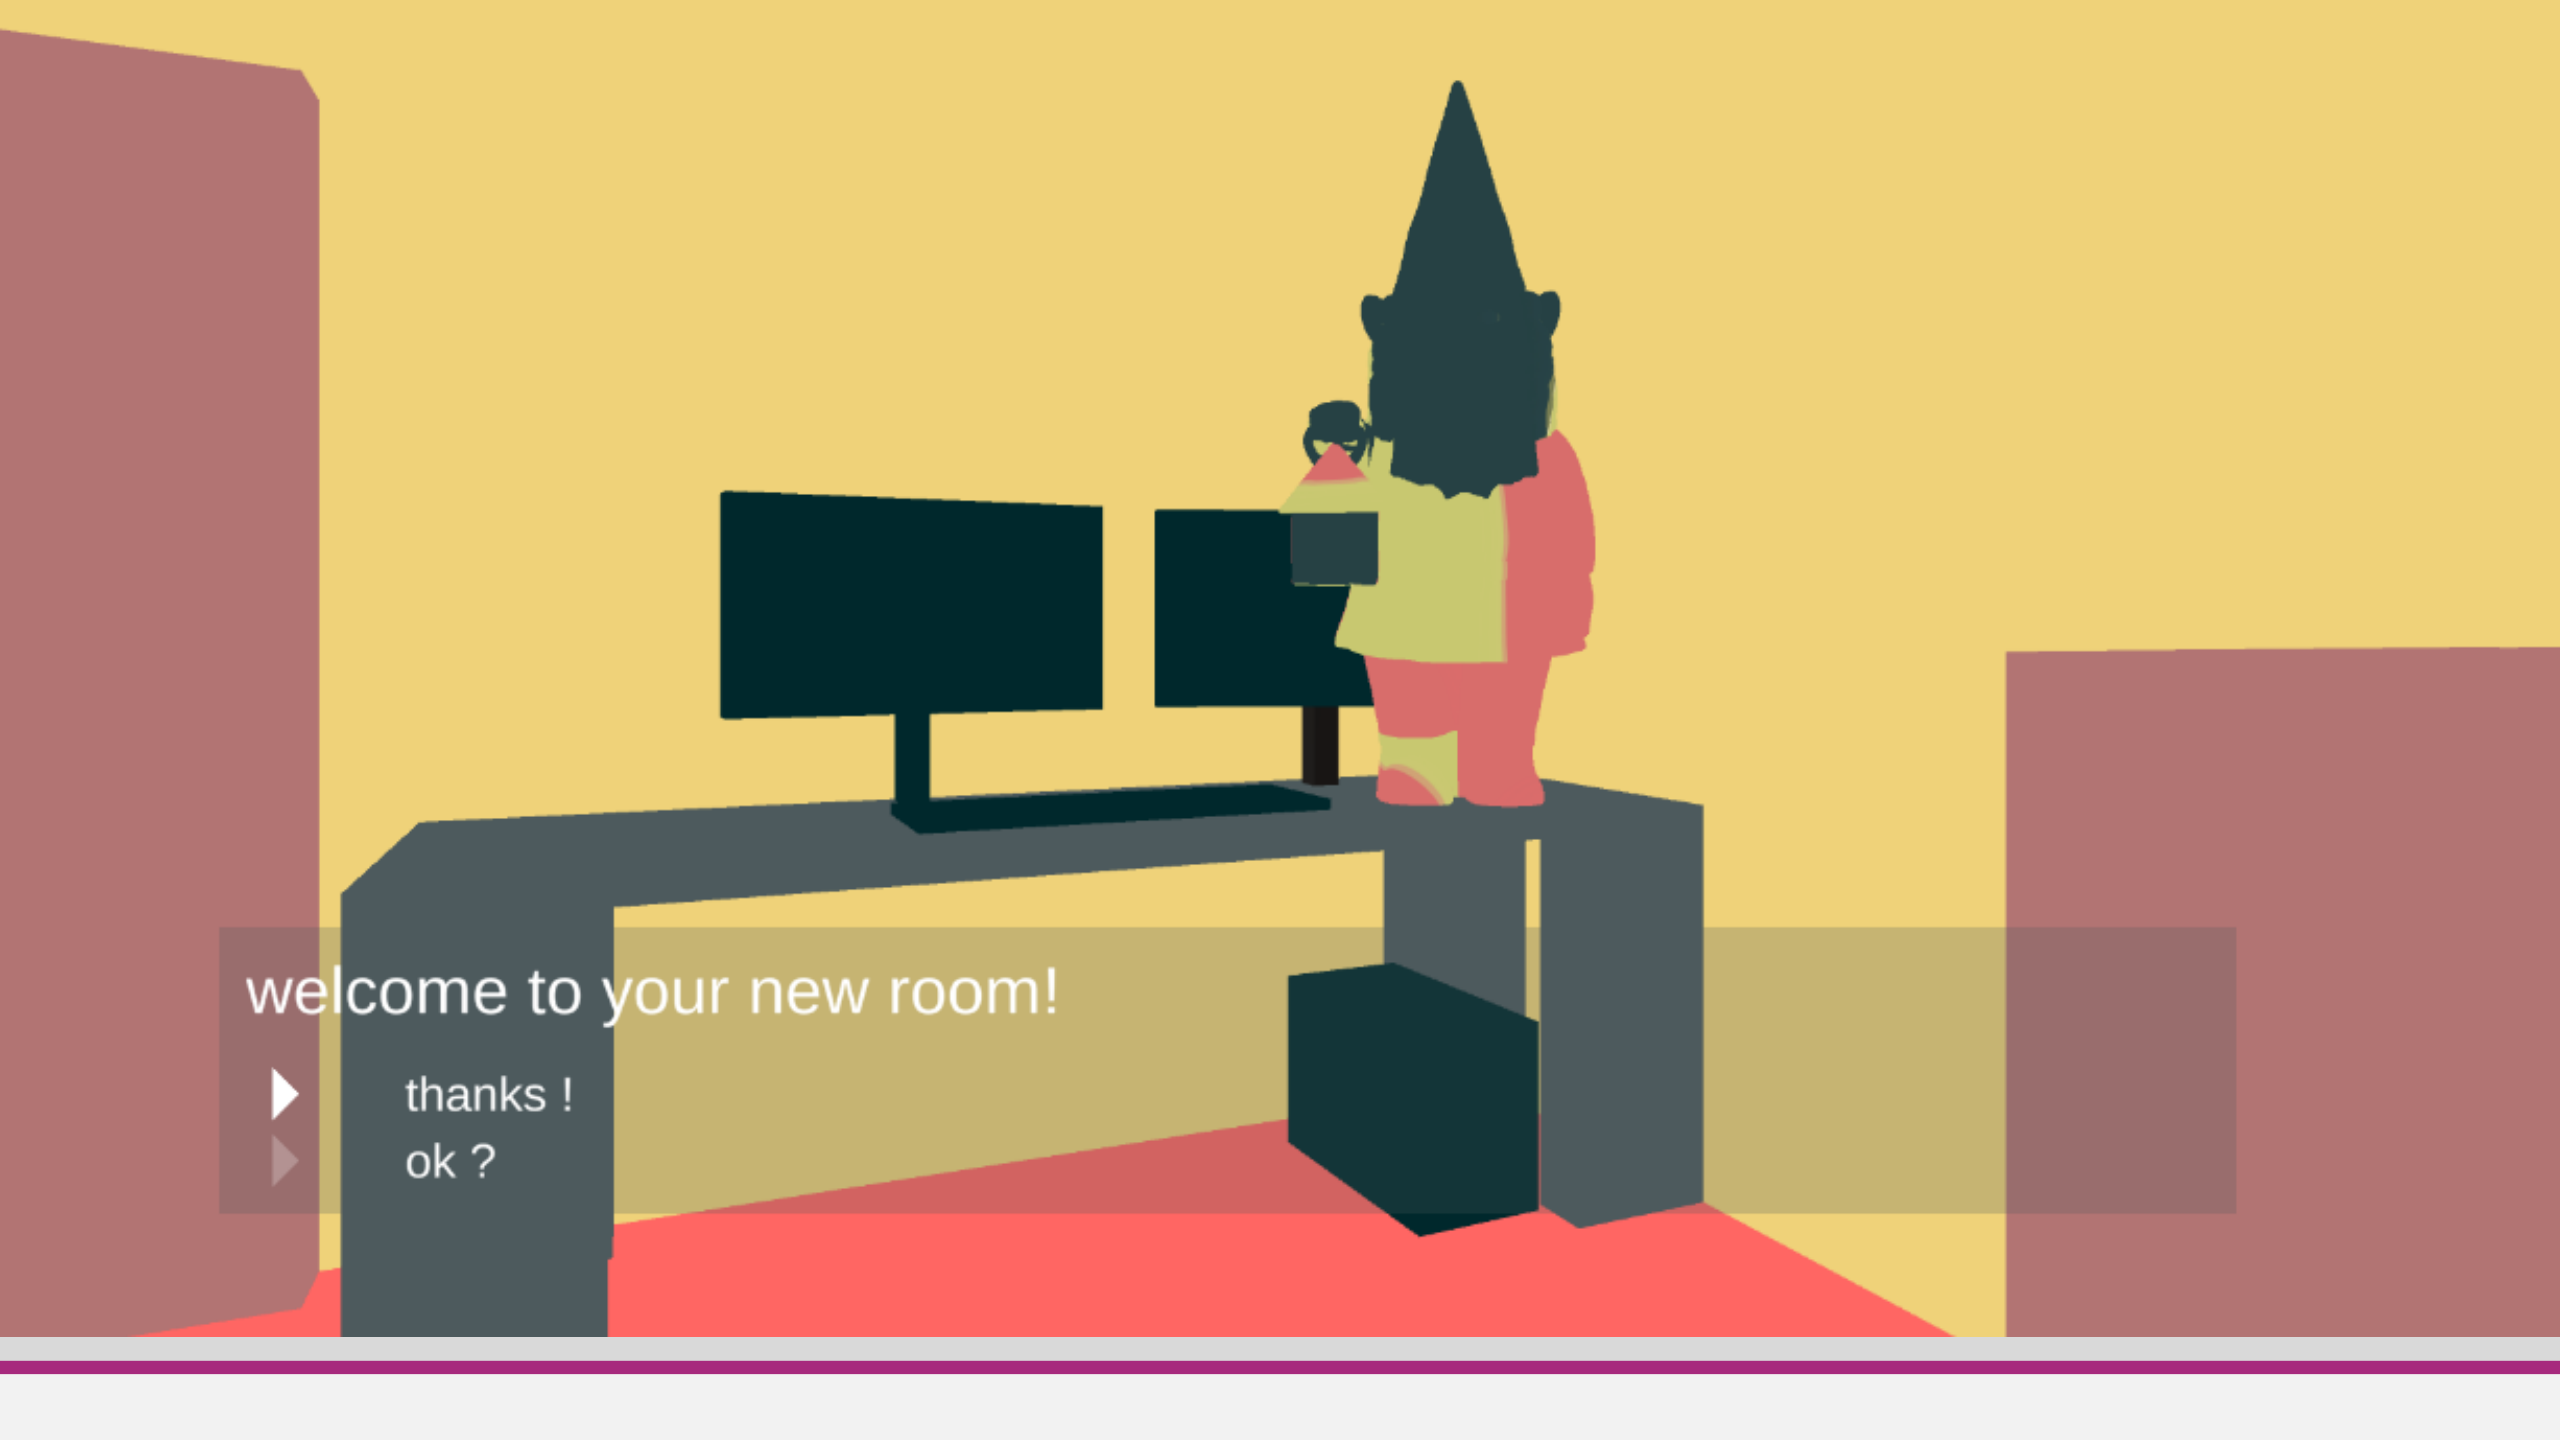

Released April 2023

Exhibited at Voidspace Live 2024 and Playtopia 2025

game available from
<https://matallon.itch.io/rarity>

more at <https://marytallontire.co.uk/rarity>

welcome to your new room!

thanks !

AR filters

Filters created in Lens Studio
Solo project

Working with Lens Studio to create various AR experiences, from traditional Snapchat filters to some more experimental art lenses. Filters I have created collectively have around 7.5 million views on Snapchat, however I have also created filters for brands on a freelance basis.
